**Subject:** RE: [Non-DoD Source] Remediation Locations  
**Attachments:** smime.p7s

Mr. Carey,

1. What is the status of the previous sites suggested?

My Real Estate group has called the various locations. The lot where the old gas station was located was leased. We are currently waiting for responses from other landowners/real estate agents.

2. How are the discussions going with Nassau County and NYS on using the recharge basins?

I had a meeting with Nassau County and USGS on Wednesday. USGS has information about the capacity of the basins that I will be reviewing. We also discussed the use of three of the creeks (Massapequa, Seaford and Bellmore) to discharge of the treated water.

3. Can you provide an update on the additional western monitoring well being installed for Massapequa?

The Navy has installed the VPB167 and is currently installing the monitoring well (RE-133D2).

R/

Lora

**Subject:** [Non-DoD Source] Remediation Locations

Ms. Fly,

Attached (PDF and photo) please find an additional location for the Navy to consider to install remediation facilities south of Hempstead Turnpike. I also have the following questions:

1- What is the status of the previous sites suggested?

2- How are the discussions going with Nassau County and NYS on using the recharge basins?

3- Can you provide an update on the additional western monitoring well being installed for Massapequa?

Thank you,

Stan Carey, Superintendent

Massapequa Water District
